CERTIFICATIONS

[ISPR, 07/04/2026] **Global Politics**

learn how state shape global order and how diplomacy works. To really get your head around global order, you have to dig into statecraft—how countries actually use their power. Forget the high-minded ideals for a minute and look at the realpolitik. States are always jockeying for position, trying to maximize their security and influence. That means understanding things like balance of power, alliances, and the role of international institutions (even if they're often flawed). Diplomacy is the main game here—it's not just polite conversation; it's a constant process of negotiation, compromise, and sometimes, strategic ambiguity. It's about reading the room, understanding other states' motivations, and finding ways to advance your own interests without triggering a major conflict.
